9. Do you have any other comments to add to your evaluation?

Please provide any additional constructive comments

- A great TA with strong knowledge of this course. He is also very nice. who explains questions in detail and has his own way of solving problems. Go FUDAN !
- Clearly cares about students' learning. Sometimes he may trip over his own teaching and mess up a few computations here and there, but it is clear that he understands the material (at least up until what he has reviewed before teaching!). Engages the class in the learning and makes the problems seem much easier than they actually were, once the proper knowledge was applied. Holds many reviews and is overall a solid TA.
- goofy dude, very animated and interesting to watch, sections were extremely helpful. powerful grasp of subject matter. 10/10
- He is ok, not the best. He would skip a lot of steps, so you have to pay very close attention to get the best out of the class.
- He knows the material very well, is approachable, and makes discussion sections both useful and enjoyable.
- I don't know why, but I've had a really good experience with all my Math 20 TAs. Yuchao was probably my favorite though. He's just a really funny, approachable guy. Definitely understood where students were coming from. Very good at explaining things. Apparently he leaned Vector Calc this quarter, too. Very relaxed attitude, easy to listen to. Felt like he belonged in an anime; he kind of flows when he moves around the chalkboard, which is a bit funny to watch. Anyway, overall really cool and helpful. Thanks!
- I loved the way Nan taught (he provides work sheets that review the material learned so far in lecture), but his discussion times were ridiculous (8 and 9 PM).
- Like approach to do hw problems to help improve understanding. Can try to explain a little more of why we do what we do.

- My favorite math TA thus far! Never missed a discussion section.
- Normally I don't go to math discussion sections, but I did this quarter, and he was pretty helpful.
- really cares about his students and comes prepared
- This teaching assistant was enthusiastic about helping anybody who asked for help. However, he is sometimes difficult to understand and works through problems too quickly leaving the students with difficulties behind.
- You seem to be a pretty fun guy. Thanks for the help
- Yuchao is one of the top TA's I have ever interacted with in the math department in terms of preparing ahead of class and knowing the material in order to best explain it to students.
