- Best TA I've had at UCSD thus far. Probably learned more from him than from the professor.

- Yuchao has made section extremely fun and engaging. Aside from that, his explanations of concepts are also very clear. I appreciate how he goes over some of the big, important concepts from lecture before jumping into the homework. He never gives away any real answers/code for the homework, although he gives us key codes that will help with some of the technical stuff for homework. He does a great job of explaining the strategies behind solving the homework without completely giving away the answer. His sections and emails have equipped me well to solve problems on my own, and I really appreciate that he gives us key codes that make our lives a little easier because some of us were completely new to R before this class. Math TAs should be like Yuchao!

- Yuchao is one of the best TAs I have had in the math department. He made an effort to make sure everyone was understanding the material he was teaching, and he went above and beyond what he was required to do to make sure he was able to help his students as much as possible.
